

Lab 1 - Use-Case Flow

Satvik J | PES1UG24CS714

Centralized Audit Trail Compliance Engine

Use Case: UC-05 Generate Compliance Report

Primary Actor: Compliance Officer

Main Success Scenario

1. Compliance Officer logs into the system
2. Officer selects Generate Compliance Report
3. System shows the report search options
4. Officer selects the date range and compliance criteria
5. System searches the centralized audit trail
6. System displays the matching audit records
7. Officer selects the records needed for the report
8. System creates the compliance report
9. System shows the report to the officer
10. Officer exports the report
11. Use case ends successfully

Alternate Flow - No Matching Records

- 5a. The system finds no records that match the selected criteria
 - 5a1. The system displays No matching audit records found
 - 5a2. The officer changes the search criteria and searches again
 - 5a3. If the officer cancels the search the report is not generated and the use case ends
